

Eco Tales

For Guardians of Planet Earth

Summary

A story journey to connect with the rhythms of Nature and listen to the stories of some of the creatures we share Planet Earth with.

We'll find out why trees stopped talking to humans and create a more positive ending to hear what the trees have to say.

We'll see that water is life and how a frog's song helped to bring water to those in need.

We'll discover that everything is connected in the great web of life.

We'll discuss the importance of looking after our home, Planet Earth and being guardians of a more sustainable planet that future generations would be proud of.

Jennifer is an [Earth Story Teller Activist](#) for the [Earth Stories collection](#) project.
